

SO.F.IA

AI Built for Monitoring

Automates repetitive processes • Cuts down operational workload
Keeps your team focused on what actually matters

When technology thinks alongside you,
security evolves.

Virtual Operator

Conversational AI for Event Response

- Calls in any language and tone you set
- Verifies users with a keyword
- Escalates to a live operator the moment it detects risk

Video Analytics Rounds

Works in the background with Any RTSP Camera

- People & vehicle detection
- Line crossing
- Out-of-focus camera
- Connection failures

Every anomaly SOF.IA catches becomes an instant alert for your operator.

VideoControl

Camera Arm/Disarm via SmartPanics

Users control motion detection activation straight from their app – making it possible to offer video-based monitoring services without relying on traditional alarm systems.

Guide Monitoring

Step-by-Step Protocols for Operators:

Every action must be completed before moving to the next: contact responsible parties, check cameras, execute the defined response. Perfect for onboarding new operators, handling critical situations, and keeping operations consistent.

Smart WhatsApp Assistant

- Sends event notifications
- Auto-schedules technical visits
- Manages open/close check deferrals

Fewer calls. More done

The next step in monitoring.
