

VigiControl

Real-time operational control

Better decisions

Lower costs

More control

SoftGuard

Supervising security operations
is one of the biggest cost drivers in the industry.

As a company grows, so does complexity:
more guards, more patrols, more clients — and more field supervisors.

Vehicles. Fuel. Radios. Mobile phones. Rotating shifts. Downtime.
It's a necessary structure — but often an inefficient one.

VigiControl digitalizes field supervision.

What once required constant physical presence is
now managed through clear, real-time data.

Each guard operates from an app.
Every action is logged.
Any deviation is flagged in time.

Supervision shifts from reactive to preventive —
measurable, accountable, and profitable.

CONTROL CENTER

Clear data. Smart decisions. From the web platform, you can manage checkpoints, alerts, and reports with full visibility:

Operational deployment map

Inactivity and compliance alerts

Patrol completion rates

Actual hours worked

History of actions and assignments

One operator can oversee what previously required multiple field supervisors.

Easy to use. Built to prevent mistakes.

• Biometric Check-In

Guards clock in with geolocation included. Photo or facial recognition helps prevent unauthorized replacements and false attendance records.

• Panic Button

Emergency alerts with precise location and multimedia evidence.

• Rounds & Patrols

Check-ins at each control point, with automatic alerts for missed checkpoints.

• Presence Verification

Random prompts confirm real-time guard activity. If there's no response, a Man Down alert is triggered at the control center.

• Field Reports

Customizable incident reports based on each service type. Includes location, text, photos, and video.

• Real-time Dispatch

Ideal for response services. The nearest available guard receives a push notification to handle the situation.

• Visitor and Access Management

Validate entries directly from the app. Search the database, scan QR invitations, or register visitors on-site.

VigiControl

Guard tours, simplified.
